## OUR PRODUCTS

### Fish – breeding cages

The shape – a cylinder; 4-, 6- and 8- faced (other shapes on a by – order bases are possible)

The mesh of different sizes (a square or a rhombus)

Single or double bottom and walls

Cage production with a covering is possible

Strengthening of the walls and bottom with the help of the rope and cord

### The plates made of the nylon twisted twines

The structure – Tex

The diameter of the twine – 0.36...0.8mm

The quantity of the meshes according to the height – 45...100 pcs.

The breaking force – 3...17 kgf

The length – 150m

### The plates made of the nylon unit twines

The diameter of the twine – 0.2mm

The size of the mesh – starting with 18mm

The quantity of the meshes according to the height – 50...150 pcs.

The breaking force – 2kgf

The length – 150m

### Trammel nets (Three – sided fishing nets)

The structure – Tex/Denier

The diameter of the twine – 0.66...0.8mm

The size of the mesh – 150...300mm

The quantity of the meshes according to the height – 4...100 pcs.

The length – 150m

Different coloring on a by – order bases is possible. Please, plan your purchases in advance.

### Filar nylon (Kapron) netwebbings

The structure – Tex/Denier

The diameter of the twine – 0.45...2.5mm

The size of the mesh – 6.5...275mm

The quantity of the meshes according to the height – 130.5...620.5 pcs.

The length – 14...150m

The weight – 9...45kg

The breaking force – 5.1...116kgf

### Knitted (knotless) nylon (kapron) netwebbings

The structure – Tex

The diameter of the twine – 0.7...1.8mm

The size of the mesh – 2.8...40mm

The quantity of the meshes according to the height – 313...595 pcs.

The length – 40...50m

The weight – 10...60kg

The breaking force – 7.5...54kgf

### The nets of special purposes –

Camouflaging, protective, façade and constructional

### Sport nets –

Nets for football and hockey goals

For golf, paintball, court and table tennis

### Protective nets –

For ski trails, tennis courts, pleasure – grounds, football fields, pools

### Agriculture nets –

For greenhouses, hot houses, aviaries etc.

The nets of different types and sizes can be produced on a by – order bases. Different coloring is possible.

### Fishing twisted twines

The material – nylon

The structure – Tex/Denier

The approximate diameter – 0.33 – 2.5mm

The breaking force – 2.7...128kgf

Cable – laid twines with the heart yarns

The material – nylon, 8 or 16 strands

The approximate diameter – 4...16mm

The breaking force – 300...4500kgf

Floating and weighted cords

Cords with a colorful strand or cords of a particular color on a by – order bases

Cork floats

The material – foam plastic

The diameter – 27...120mm

The height – 45...180mm

The breaking force – 0.27...18

A complement with an inner plastic plug is possible. Production of the cork floats of different colors is possible.
